# SBC (Smart Business Card)

## The Professional way to Connect

Share contact details with a single tap!

- Leave the standard business card and embrace your new SBC!
- To make a great first impression, tap and share your contact details and gather leads.
- No need to download any App.
- Compatible with all modern smartphones (Apple and Android).

## What is SBC (Smart Business Card) ?

**MICRO CHIPPED  
WITH YOUR DETAILS**

**CONTACT LESS  
BUSINESS CARD**

**TAP, SAVE AND  
SHARE A CONTACT**

**UP TO  
1 MILLION  
TAPS**

**SMART** Business Cards is a rigid plastic credit card type of business card. It comes with an embedded microchip, enabling you to transmit your contact details with just a tap on a smartphone.

# SBS Product Features

- Custom engraved with your logo
- Graphic Design to your standard
- Programmed with your contact details (Name, phone number, email address, Company profile, Social Media links, physical address and website)

# Why is SBC better than traditional business cards?

**Preventing the spread of germs:**  
With the standard business card, you hand the card over to a client. With the Smart Business card, there is no interaction and the danger of spreading germs especially in view of the COVID regulations.

**Avoiding unnecessary waste:**  
The client takes your card and places it in his drawer and forgets about it whereas with the SMART Business Card your information is captured.

# Why is SBC better than traditional business cards?

## Saving money:

The average business card cost for 500 cards = 50 Rial.

The SMART Card is only 30 Rial (for two cards) and has up to a million scans (try and buy a million printed business cards today!)

The Key ring is 40 Rial and the Combo (Smart Card and Keyring) is 60 Rial

## ONLY ONE:

You only need one company SMART card per representative or employee. If the representative or employee resigns the SMART card can be reprogrammed with the new contact details.

## How does it work?

The SMART Business card has 2 types of methods to get info across to the client's phone:

- NFC and
- QR code

**NFC** allows you just to tap the card onto the NFC enabled phone.

**QR code** for the phones that do not have NFC technologies. The QR code works also without an App on most phones and can be scanned by using your camera on the smartphone.

Most new smartphones come standard with NFC technology and QR Code enabled.

## Will it work on my phone?

Check if your smartphone is compatible with your SMART Business Card:

From 2016 to onward all android & IOS Devices have NFC

- Open the "Settings App" on your smartphone device.
- Go to the search option and type "NFC"
- If you see the app showing results, then your smartphone supports NFC technology.
- Make sure the "NFC" option is enabled.

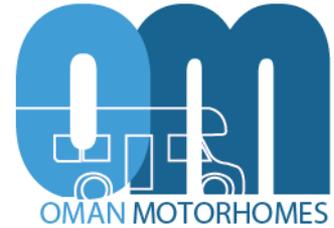

If there is no "NFC" option:

You have to scan the QR code at the back of your card. If you don't have a QR reader built-in or app, follow the links below to download. By scanning the QR code, the exact same Contact Details / vCard will be displayed.

Multiple designs options available, inc. custom designs

# Commercial Proposal

- 1-50 OMR 30 for two cards (two cards for single employee, one is lost used the spare one)
